this book offers an explanation of how the great pyramid was designed and built

the ancient world comes to life in the first volume in a two book series on the history of egypt spanning the first farmers to the construction of the pyramids famed archaeologist john romer draws on a lifetime of research to tell one history s greatest stories how over more than a thousand years a society of farmers created a rich vivid world where one of the most astounding of all human made landmarks the great pyramid was built immersing the reader in the egypt of the past romer examines and challenges the long held theories about what archaeological finds mean and what stories they tell about how the egyptians lived more than just an account of one of the most fascinating periods of history this engrossing book asks readers to take a step back and question what they ve learned about egypt in the past fans of stacy schiff s cleopatra and history buffs will be captivated by this re telling of egyptian history written by one of the top egyptologists in the world

1932 contents general features geographical historical dimensional internal passages chambers structural details of the outside corner sockets platform casing stones core masonry base measurements geometry of the pyramid egyptian cub

the great pyramid is a book in stone a book in which knowledge of mathematics knowledge of architecture and knowledge of astronomy are stored this is the knowledge of the pyramid about our physical world and it is told in the first part of this book the great pyramid also tells the history of human time and human spiritual life because in the measures of the pyramid it leaves coded testimonies about biblical events biblical codes and about the end of time of the earth in the days of the transformation of this world into a higher existential level between 2035 2070 in the second part of this book pyramid s story about our spiritual world is told the book is intended for a wide readership especially lovers of mysticism and esotericism freemasons architects and students

another solid work of history from an author and historian who truly grasps the mysteries of ancient Egypt Kirkus reviews drawing on a lifetime of research John Romer chronicles the history of ancient Egypt from the building of the Great Pyramid through the rise and fall of the Middle Kingdom a peak of Pharaonic culture and the period when writing first flourished through extensive research over many decades of work reveals how the grand narratives of 19th and 20th century Egyptologists have misled us by portraying a culture of cruel monarchs and chronic war instead based in part on discoveries of the past two decades this extraordinary account shows what we can really learn from the remaining architecture objects and writing a history based on physical reality

the Egyptologist acclaimed for re-dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity the Great Pyramid of Giza what is the Great Pyramid of Giza ask that basic question of a traditional Egyptologist and you get the basic traditional answer a fancy tombstone for a self-important pharaoh of the Old Kingdom this Egyptologist's argument is the sole finding based on the data and the only deduction supported by science by implication anyone who dissents from this point of view is unscientific and woolly-minded a believer in magic and ghosts indeed some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them yet from beneath the obvious terms of this controversy a deeper more significant question arises how is it that the Great Pyramid exercises such a gripping hold on the human psyche adding cryptic grace to the back of the one-dollar bill and framing myriad claims of New Age pyramid power in pyramid quest Robert M. Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid and develop a stunning hypothesis this ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought extending far back into a little-known time in tracing that story we come to understand not only the Great Pyramid but also our own origins as civilized beings

1870 fellow British Society of Arts member Institution of Mechanical Engineers member Institution of Engineers of Scotland hon. Librarian Philosophical Society of Glasgow etc including a critical examination of Sir Henry James' notes on the

many theories surround the geometric and mathematical factors that determined the shape of the Great Pyramid Herz Fischler examines and tests the theories of a range of mostly Victorian archaeologists architects engineers and mathematicians including Jomard Perrin Ramee and Petrie
