This volume offers snapshots of how rights are debated and employed in public discourse to reshape legal and political relations at the beginning of the twenty-first century. It explores how rights are used to challenge the state of affairs by individuals and groups who seek justice and the strategies devised to defy the existing rights by those who wish to recast the social and political order. This volume discusses rights firstly in relation to actual events and issues faced by policy makers, courts, international agencies, or ordinary people. These range from the demands of minority groups living in the West to freely practice their culture and/or religion to the threat of terrorism, the regulation of asylum rights, the investor's rights to disclosure, and the rights of artists to freedom of expression. Secondly, rights discourse is examined in relation to attempts to redefine the form and content of rights, for example by banning the right to wear religious symbols in public institutions or detaining terrorism suspects without trial. Thirdly, rights discourse is explored in connection with the attempts to develop new notions of rights such as human security which can more effectively respond to the challenges of late modern societies. Finally, the statuses of rights in sociological theory and socio-legal research are briefly discussed and analysed.

Building on a series of ESRC-funded seminars, this edited collection of expert papers by academics and practitioners is concerned with access to civil and administrative justice in constitutional democracies where, for the past decade, governments have reassessed their

priorities for funding legal services embracing new technologies that reconfigure the delivery and very concept of legal services cutting legal aid budgets and introducing putative cost cutting measures for the administration of courts tribunals and established systems for the delivery of legal advice and assistance without underplaying the future potential of technological innovation or the need for a fair and rational system for the prioritisation and funding of legal services the book questions whether the absolutist approach to the dictates of austerity and the promise of new technologies that have driven the coalition government s policy can be squared with obligations to protect the fundamental right of access to justice in the unwritten constitution of the united kingdom

access to justice equality before the law and the rule of law are three fundamental values underpinning the civil justice system this book examines these values and how although they do not have great leverage in decision making by the courts they are a crucial foundation of the civil justice system and a powerful argument for arrangements such as legal aid the impartial application of law and the independence of the judiciary the second theme of this book concerns the role of procedure often regarded as of secondary importance compared with substantive law taking the definition of procedure at its widest the book discusses lord woolf s inquiry and demonstrates how procedural reform can maximize a fundamental value like access to justice this linkage is furthered in a later analysis of access to justice comparatively in relation to civil and commercial law thirdly the book looks at understanding how law works and how it could be made to work better and concludes that this demands both a knowledge of law and of law s context this theme offers a framework for the book which then goes on to deal with the machinery of the law and discusses what the courts do civil procedure and the ethics of lawyer s conduct all in relation to the broader context of access to justice this broader context of the law is particularly prominent in the latter half of the book which deals with various dimensions of the impact of the law including studies of civil and social rights in practice the role of european law in the destruction of aboriginal society in australia and commercial law in asia these examples raise issues about the gap between the law and reality the potential law has to destroy social patterns and the relationship between law and economic development this is a thought provoking critical exploration which has much to offer those interested in the operation of the civil justice system
