Segments Portions of a line with two endpoints

Rays Portions of a line extending infinitely in one direction They have one endpoint

Angles Formed by two rays sharing a

common endpoint vertex They are measured in degrees 3 Types of Angles Acute Angle Less than 90 degrees Right Angle Exactly 90 degrees Obtuse Angle Greater than 90 degrees but less than 180 degrees Straight Angle Exactly 180 degrees 4 Angle Pairs Complementary Angles Two angles whose sum is 90 degrees Supplementary Angles Two angles whose sum is 180 degrees Vertical Angles Opposite angles formed by the intersection of two lines They are congruent Linear Pair Two adjacent angles that form a straight angle 5 Geometric Figures Triangles Threesided polygons with three angles Quadrilaterals Foursided polygons with four angles Polygons Closed figures formed by line segments Circles Sets of points equidistant from a central point Preparing for the Test 1 Review the Textbook and Notes Start by thoroughly reviewing the Glencoe Geometry textbook and your class notes Pay special attention to definitions theorems and postulates You can use flashcards or other memory aids to memorize important concepts 2 Practice Problems 3 Glencoe Geometry provides numerous practice problems at the end of each section Work through these diligently focusing on understanding the concepts behind each problem Dont just rely on memorizing steps aim to internalize the reasoning behind the solutions 3 Study Guide and Practice Tests Utilize study guides and practice tests available online or in your textbooks companion resources These tools provide a comprehensive overview of the chapters content and offer additional practice questions similar to those you might encounter on the real test 4 Seek Help When Needed Dont hesitate to ask your teacher or a tutor for help if you find yourself struggling with certain concepts They can provide additional explanations and guidance to clear up any confusion Common Test Question Types Chapter 1 tests typically include various types of questions designed to assess your understanding of the concepts covered Here are some common question formats Multiple Choice These questions offer several answer choices and you must select the most accurate option TrueFalse You must determine whether a statement is true or false Short Answer These questions require brief explanations or calculations FillintheBlank You must complete a sentence or phrase with the appropriate term or concept Matching You must match terms or concepts with their corresponding definitions or examples DiagramBased You may be given a diagram and asked to identify specific geometric figures angles or relationships ProblemSolving These questions require you to apply your knowledge to solve realworld problems involving geometric concepts TestTaking Strategies Read Carefully Thoroughly read each question and all answer choices before making a decision Identify Key Information Highlight or underline important details within the question and diagram Eliminate Incorrect Answers Use process of elimination to narrow down your choices 4 Show Your Work For problemsolving questions show all your steps clearly to ensure clarity and potential partial credit Manage Time Pace yourself through the test allocating enough time for each section Check Your Answers After completing
