shorn of all subtlety and led naked out of the protective fold of educational research literature there comes a sheepish little fact lectures don't work nearly as well as many of us would like to think george cobb 1992 this book contains activities that guide students to discover statistical concepts explore statistical principles and apply statistical techniques students work toward these goals through the analysis of genuine data and through interaction with one another with their instructor and with technology providing a one semester introduction to fundamental ideas of statistics for college and advanced high school students workshop statistics is designed for courses that employ an interactive learning environment by replacing lectures with hands on activities the text contains enough expository material to stand alone but it can also be used to supplement a more traditional textbook some distinguishing features of workshop statistics are its emphases on active learning conceptual understanding genuine data and the use of technology the following sections of this preface elaborate on each of these aspects and also describe the unusual organizational structure of this text

this first edition focuses on probability and the bayesian viewpoint it presents basic material on probability and then introduces inference by means of bayes rule the emphasis is on statistical thinking and how one learns from data the objective is to present the basic tenets of statistical inference unique in its format the text allows students to discover statistical concepts explore statistical principles and apply statistical techniques in addition to the numerous activities and exercises around which the text is built the book includes a basic text exposition for each topic and data appendices

although the importance of steric fit for receptor effector 1 interactions was recognized since emil fischer proposed his lock and key theory the whole area of steric properties is still in a very 2 4 early stage of development we have a fairly good idea about el tronic and hydrophobic parameters but it is not easy to describe ste ric shapes of molecules without a large number of data there are se veral cases of good qsar s developed for rather large series of mole 5 cules without steric parameters for example see papers by hansch 6 or franke but the state of steric parameters is nevertheless one of the most important drawbacks especially concerning the ability of en compassing within a single qsar molecules of different shapes and stereoisomers

from today's steric parameters one may mention the 7 Taft parameters which gave good results in organic chemistry the 8 10 rather cumbersome way of measuring shape differences of Moore and 11 12 Allinger and the 1 b b parameters of Verloop 1 4 the work described here consists of two types of approaches to the steric fit problem the first approach consists of developing new parameters to describe different characteristics of the molecular shape i.e. branching bulkiness this is done by means of topological indices
