aliens have been a major theme in science fiction literature from the very beginnings of the genre though they seem to have morphed over the decades from humanoids six limbed and blue though they might be to the utterly incomprehensible to noncorporeal energy beings and everything in between this collection focuses on aliens as depicted in many different forms over many different decades while in no way comprehensive i m not sure a definitive book of alien stories could ever be assembled we think this one is at the very least a lot of fun
