singapore fell to japan on 15 february 1942 within days the japanese had massacred thousands of chinese civilians and taken prisoner more than 100 000 british australian and indian soldiers a resistance movement formed in malaya s jungle covered mountains but

the vast majority could do little other than resign themselves to life under japanese rule the occupation would last three and a half years until the return of the british in september 1945 how is this period remembered and how have individuals communities and states shaped and reshaped memories in the postwar era the book response to these questions presenting answers that use the words of chinese malays indians eurasians british and australians who personally experienced the war years the authors guide readers through many forms of memory from the soaring pillars of singapore s civilian war memorial to traditional chinese cemeteries in malaysia and from families left bereft by japanese massacres to the young women who flocked to the japanese sponsored indian national army dreaming of a march on delhi this volume provides a forum for previously marginalized and self censored voices using the stories they relate to reflect on the nature of conflict and memory they also offer a deeper understanding of the searing transit from wartime occupation to post war decolonization and the moulding of postcolonial states and identities

since the 1990s questions of japanese wartime conduct apologies for aggression and compensation to former victims of the country s imperial policies have been brought to the fore of national and regional politics the state is undoubtedly the most important actor in the process of memory production and along with conservative legislators and the grass root revisionist movement there has been a consistent trend towards denying or undermining the existing acknowledgments of responsibility for japan s wartime past however to fully comprehend war memory in japan due attention must be paid to competing discourses that demand an alternative view and only then can the complexity of japanese war memory and attitudes towards the legacies of the asia pacific war be understood the politics of war memory in japan examines the involvement of five civil society actors in the struggle over remembering and addressing the wartime past in japan today in studying progressive war memory activists it quickly becomes clear that the apologia by conservative politicians cannot be treated as representative of the opinion of the majority of the japanese public indeed this book seeks to remedy the disparity between studies devoted to the official level of addressing the history issue and the grass root historical revisionist movement on the one side and progressive activism on the other furthermore it contributes to scholarly debates on the state of civil society in japan challenging the

characterisation of japanese civil society as a depoliticised space by demonstrating a more contentious side of civil society activism drawing important new empirical research this book will be of huge interest to students and scholars of japanese civil society japanese politics japanese history and memory in japan

hokkaido the northernmost island of japan barely features in most histories of the second world war however the combination of distinctive war experiences a vibrant set of local historian groups and powerful media organizations disseminating local war history has generated an identifiable set of local collective memories hokkaido's status as an early colonial acquisition also makes the island an important vantage point from which to reassess the course and nature of the japanese empire this book argues that hokkaido's experiences of war and its militarized post war constitutes a local case study with a much greater national and international significance on both theoretical and empirical grounds than first impressions might suggest using japanese language sources presented for the first time in english and a number of detailed local history case studies it offers a fascinating and hitherto little known perspective on the second world war it also combines a comprehensive theory of how war memories operate at the local level within a broad historical context that explains hokkaido's pivotal role within japanese imperial history demonstrating that understanding local history and memories is essential for a nuanced understanding of national history and memories the book will be highly valuable to students and scholars of japanese history second world war history and asian history

remembering and forgetting 1916 engages with the diverse divergent and at times contradictory discourses of commemoration in ireland it explores the complex politics of commemoration of four significant events in irish history the easter rising the battle of the somme the 1798 rebellion and the h block hunger strike it asks how the commemorations of these events have become incorporated into present politics in the wake of the good friday agreement the book begins and ends with the easter rising the construction of 1916 as the pivotal moment of irish history identity and memory has had lasting consequences for the irish definition of political conflict and how this is defined through commemoration in

takashi yoshida provides a historical analysis of war and peace museums from the late nineteenth century to the present and traces the historical development of a pacifist discourse in postwar japan that centered on japan s war crimes and responsibility during the so called fifteen year war which began in 1931 with japan s invasion of manchuria and ended in 1945 with the nation s defeat prior to the defeat a culture of war gripped the japanese empire every segment of japanese popular culture during the war bore witness to the flood of patriotism in this book yoshida attempts to demonstrate that the acceptance of japanese wartime aggression and atrocities as historical facts remains evident to this day in the culture of peace museums in japan those who have little knowledge of contemporary japan often hastily conclude that the japanese have been united and monolithic in the way they feel the war should be remembered this book seeks to challenge that assumption
