how should we live what do we owe to other people in goodness and advice the eminent philosopher judith jarvis thomson explores how we should go about answering such fundamental questions in doing so she makes major advances in moral philosophy pointing to some deep problems for influential moral theories and describing the structure of a new and much more promising theory thomson begins by lamenting the prevalence of the idea that there is an unbridgeable gap between fact and value that to say something is good for example is not to state a fact but to do something more like expressing an attitude or feeling she sets out to challenge this view first by assessing the apparently powerful claims of consequentialism thomson makes the striking argument that this familiar theory must ultimately fail because its basic requirement that people should act to bring about the most good is meaningless it rests on an incoherent conception of goodness and supplies not mistaken advice but no advice at all thomson then outlines the theory that she thinks we should opt for instead this theory says that no acts are simply good an act can at most be good in one or another way as for example good for smith or for jones what we ought to do is most importantly to avoid injustice and whether an act is unjust is a function both of the rights of those affected including the agent and of how good or bad the act is for them the book which originated in the tanner lectures that thomson delivered at princeton university s center for human values in 1999 includes two chapters by thomson goodness and advice provocative comments by four prominent scholars martha nussbaum jerome schneewind philip fisher and barbara herrnstein smith and replies by thomson to those comments
