since the late 1970s anglophone and german military literature has been fascinated by the wehrmacht s command system especially the practice of auftragstaktik there have been many descriptions of the doctrine and examinations of its historical origins as well as unflattering comparisons with the approaches of the british and american armies prior to their adoption of mission command in the late 1980s almost none of these however have sought to understand the different approaches to command in the context of a fundamental characteristic of warfare friction this would be like trying to understand flight without any reference to aerodynamics inherently flawed yet this is the norm in the military literature this book seeks to address that gap first the nature of friction and the potential command responses to it are considered this allows the development of a typology of eight command approaches each approach then being tested to identify its relative effectiveness and requirements for success second the british and german armies doctrines of command during the period are examined in order to reveal similarities and differences in relation to their perspective on the nature of warfare and the most appropriate responses the experience of erwin rommel both as a young subaltern fighting the italians in 1917 and then as a newly appointed divisional commander against the french in 1940 is used to test the expression of the german doctrine in practice third the interaction of these different command doctrines is explored in case studies of two key armoured battles amiens in august 1918 and arras in may 1940 allowing the strengths and weaknesses of each to be highlighted and the typology to be tested the result is intended to offer a new and deeper understanding of both the nature of command as a response to friction and the factors that need to be in place in order to allow a given command approach to achieve success the book therefore in two ways represents a sequel to the author s earlier work command or control command training and tactics in the british and german armies 1888 1918 london cass 1995 in that it both takes the conceptual model of command developed there to a deeper level and also takes the story from the climax of 1918 up to the end of the first phase of the second world war
