##### FAQs

- 1 How to handle tied CGAs in percentile calculations Several methods exist including averaging the ranks of tied students or using more sophisticated statistical methods like interpolation
- 2 What are the implications of a nonnormal distribution of CGAs If the CGA distribution significantly deviates from a normal distribution eg skewed distribution standard percentile calculations might not be fully representative and more robust statistical methods may be needed
- 3 How can we compare CGA percentiles across different academic programs with varying difficulty levels Standardization techniques such as zscores can be applied to adjust for differences in program difficulty and create a more equitable comparison
- 4 How can we incorporate weighting factors into CGA percentile calculations For example some courses might carry more weight than others eg majorspecific courses Weighted CGAs can be calculated and percentiles can be determined based on these weighted averages
- 5 What are the ethical implications of using CGA percentiles in highstakes decisions Overreliance on percentile rankings can lead to unfair or discriminatory outcomes Its essential to consider the limitations and use percentiles as one factor among many in making important decisions regarding admissions scholarships or other opportunities
