originally published in 1977 this book provides the first concise non technical account of what the main kinds of regional problems are how they arise and the kinds of policy which have been used to tackle them in the uk usa and western europe the book starts with a discussion of why regional problems really are situations which call for special action followed by a short preliminary classification of problem regions including those in the less developed countries then on to a more detailed survey of the origins and experience of selected problem regions in the more developed market economies the authors focus on four broad kinds of problem region agricultural regions coal mining regions old textile regions and so called congested regions they conclude with a selective survey of

regional policies in these more advanced economies distinguishing and comparing the main trends and the different national styles

if all politics are local then all economics are regional and local globalisation for all its mystery and so called inevitability has its foundations and bloodlines in urban and regional economics the economic impacts of poverty housing transportation education and crime are included this new book includes within its scope multiplier and impact analysis input output models growth theory migration urban and regional labour markets urban and regional public policy regional devolution small firms policy and foreign direct investment

originally published in 1988 leading international researchers in regional economic development have contributed an integrated set of chapters reviewing the whole field and taking stock of current thinking the book is in honour of fran-ois perroux the father of regional development theory whose contributions to two important concepts in economics time and space have been substantial the book comprises five parts part one covers perroux s work in general and on growth poles in particular part two deals with the politics of place population and regional development techniques for regional policy analysis and a neoclassical approach to regional economics in part three the canadian scene is reviewed at national and regional levels in part four chapters on urban development small and medium size cities and capital grants deal with the experiences of other countries part five concludes the book with a chapter on growth poles optimal size of cities and regional disparities and government intervention

this new and up to date text explains those aspects of economics most relevant to understanding contemporary issues facing the regional economy in the second half of the 1990s the region is considered in the context of the subregional and local urban economies and also in relation to the wider national and supranational economic framework the influence of the european community is given particular consideration the components of the regional economy and their impact on regional growth potential are explained the practical relevance of the theory is illustrated through appropriate regional examples regional and urban policies of the 1980s and

1990s are covered policy objectives and instruments are studied and policy is appraised in light of its contribution and limitations policy is placed in the context of both the european community and national and local government authorities

this handbook is essential reading for anyone with an interest in the explanation of economic growth in the space economy the editors and the individual contributors are to be congratulated on producing such an important collection of review essays which is destined to become one of the definitive reference books on the subject john mcombie *scienze regionali* offers a valuable up to date overview of many aspects of these important theoretical developments peter wood *environment planning b* the book contains a wealth of leading edge material on regional growth and development issues and provides a good historical review of the dominant mainstream theories this handbook will be a valuable asset to any graduate student researcher regional planner or policymaker interested in regional economic issues lara lamb *review of regional studies regional economics* an established discipline for several decades has gone through a rapid pace of change in the past decade and several new perspectives have emerged at the same time the methodology has shown surprising development this volume brings together contributions looking at new pathways in regional economics written by many well known international scholars the most advanced theories measurement methods and policy issues in regional growth are given in depth treatment the focus here is to collect cutting edge theories explaining regional growth and local development the authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas among regional economists and mainstream economists theories of regional growth and development need to be able to interpret more than ever the way in which regions achieve a role in the international division of labour and more importantly the way in which regions can maintain this role over time topics covered include regional growth and development policies and measurement methods development theories of innovation knowledge and space and regional production factors and growth theories and space this book will be a source of reference and information for both scholars and students in the area of regional economics

alex s father misses her birthday party and everything is spoiled until the animals on his gift of a tiny carousel come to life

compilation of writings on economic theory and practice of regional planning for economic development and location of industry covers development pole theory of economic growth regional economic policy resource allocation etc references and statistical tables

regional economics fundamental concepts policies and institutions is a unique and unconventional economics textbook which emphasizes the role of space in economics and highlights the importance of non economic factors particularly the role of institutions in regional development it also presents the approach on how to evaluate regional development performance based on economic social and environmental considerations which is the organizing principle for meeting people oriented development and sustainable development goals other essential concepts such as regional science and spatial economics are also explored in this book why activities tend to be spatially concentrated and can get more intensified despite efforts to disperse them toward other regions why infrastructure development intended to increase activities and improve the population s welfare can produce the opposite outcome of greater interregional inequality what is the role of regional and national policies in affecting growth incentives and how non economic factors such as institutions and the quality of local leaders can make a difference in welfare achievement addressing these questions allows readers to better understand the various phenomena in the actual development process

this book provides a broad coverage of topics in regional economics particularly regional development migration and forecasting it explores not only urban problems but the regional bases for economic development and the interdependence of the core metropolitan area and its extended periphery the topics covered examine the link between national economic development and decentralized markets resulting inefficient production at local levels and regional organization that enhances and promotes these efficiencies

originally published in 1983 when europe s economies were facing the worst recession since the 1930s this book reviews the outcome of a quarter of a century of research and practical experience in the field of regional economic management in the spatial context of the european community the author explores central issues by integrating the results of his own research with those of

economists geographers economic historians and psychologists it provides a wide survey of the subject demonstrates the complexity of the spatial economic systems which the regional economic planner seeks to modify analyses the strategies for regional development employed by national and international agencies and offers a substantial annotated bibliography contradictions arising from the contrasting spatial perspectives of national governments and the european commission are emphasised among other things it concludes that many regional problems strongly reflect perception and behavioural factors as well as purely economic constraints

the subject area regional economics has become topical this means that in economic analyses the production factor space is of increasing importance this study book aims to integrate space in the area of general economics in an analytical way models and their applications play a major role in the book s approach the subject of regional economics contains two broad fields the first is the theory of location including the basic principles of the economic theory of land use which has a microeconomic character the second subject is regional economic development including spatial equilibrium theory which is mainly macroeconomic in nature in the book both fields will be elaborated in detail basic principles of economics are included as background information in order to study the more advanced subjects addressed in the book another important feature of the book is its european character which is rather unique in fact the majority of the applications here are from europe regional statistical data and maps available in eurostat have been used the spreadsheet programme excel is used as a convenient tool for the computation of model results the description of major applications of excel is included in the book which makes it self contained
