David Paulides, a former police investigator, has applied his skills to questioning bigfoot witnesses. The results he has achieved in gaining access to witnesses and getting detailed information from them is both remarkable and intriguing. Furthermore, he commissioned a forensic police artist to meet with witnesses and sketch the creatures they saw. These drawings provide insights into the creature's nature never before realized. The result of this team's work is by far one of the most convincing accounts ever written on bigfoot. The conclusion reached that this creature, long revered by the Hoopa people, definitely inhabits the forested regions of Humboldt County in northern California, is so convincing that those people who doubt bigfoot's existence will be forced to think again.

Bigfoot Film Journal provides a detailed account and analysis of the circumstances and aftermath of one of the most controversial motion picture films in world history: the Patterson-Gimlin film. In October 1967, Roger Patterson and Robert Gimlin filmed what many people believe was an actual sasquatch or bigfoot on a shore of Bluff Creek in northern California. The one-minute film they took of the creature has been vigorously debated for over 40 years and it continues to reside in the annals of the unexplained. The creature filmed cannot be proven to be either an actual primate of some sort or a fabrication. Much has been written about the film in the past, but the details of the filming and its aftermath have not been thoroughly researched and subjected to in-depth critical analysis. With the assistance and cooperation of Robert Gimlin and several major sasquatch/bigfoot researchers, the author has methodically detailed the fascinating story of the filming and the subsequent events. Many little-known or indeed previously unknown facts are presented that dismiss or, at the very least, challenge current
